## SUMMARY

Junior Software Developer and UI/UX Designer who builds mobile and web applications end-to-end — from requirements gathering and interface design through deployment, testing, and production support. Experienced in developing business systems, integrating third-party and CRM platforms, and building data synchronization workflows across relational databases. Hands-on with Flutter, Node.js, REST APIs, Python, and Java, and a practical adopter of AI-assisted development workflows using Claude Code, Gemini AI, and Google Flow.

## SKILLS

**Mobile Development:** Flutter (Android/Mobile), Kotlin, Flame Engine

**Back-End, Cloud & APIs:** Laravel (PHP), ASP.NET (C#), Node.js, Next.js, Flask (Python), Google Apps Script, RESTful APIs, Google Maps API, GCP, Third-Party Integrations, AWS

**UI/UX & Design:** Figma, Adobe Photoshop, Prototyping, Wireframing, User Flows, Graphic & Multimedia Design

**Databases:** PostgreSQL, Supabase, MySQL, SQL Server, Firebase, MongoDB

**Programming Languages:** Dart, Java, Kotlin, Python, C#, PHP, JavaScript/Node.js, HTML/CSS

**AI & Developer Tooling:** Claude Code, Google Flow, Gemini AI

**Software & CRM Integrations:** GoHighLevel CRM, GitHub/Git (Version Control), Apps Script

## EXPERIENCE

**Junior Software Developer** (*promoted from Software Developer Intern*)

**7th Pillar Integrated Systems Corp.** · February 2026 – Present · Makati City, Philippines

- Own end-to-end delivery of internal business applications — a Visitor Attendance System, an Appointment Management System, and a Cab-Hailing application — from feature scoping through production release, plus front-end and back-end feature work on deployed client systems with independent production debugging.
- Design, normalize, and migrate relational database schemas across different database platforms.
- Design user interfaces and branding assets that improve usability and keep visual identity consistent across projects.
- Collaborate with developers and QA engineers to test, debug, and ship production-ready software.

### Systems Integration & Automation

**MavRick Homebuyers** · December 2025 – August 2026 · Dallas–Fort Worth, Texas

- Architected and implemented two-way CRM data synchronization between Google Sheets and Supabase (PostgreSQL) using Google Apps Script, enabling real-time lead management and streamlined operational workflows.
- Developed intelligent CRM data pipelines, including duplicate resolution and multi-source lead record merging (Mojo, XLeads, Direct Skip), improving overall data accuracy and consistency.
- Built secure backend services using PL/pgSQL RPCs via PostgREST, along with audit logging, monitoring, and optimized bulk import mechanisms to enhance CRM reliability and performance.

### Freelance Developer

**Client-Based & Independent Projects** · January 2024 – Present · Pangasinan, Philippines

- Designed and developed custom web and mobile applications for academic and client-based projects.
- Built business systems including POS, inventory, and management applications.
- Designed responsive user interfaces and implemented secure backend functionality.
- Integrated third-party APIs, authentication systems, and cloud services based on project requirements.

## PROJECTS

### Systems Integration & Automation — MavRick Homebuyers

**Client Project** · December 2025 – August 2026 · Dallas–Fort Worth, Texas

- Architected and implemented two-way CRM data synchronization between Google Sheets and Supabase (PostgreSQL) using Google Apps Script, enabling real-time lead management and streamlined operational workflows.
- Developed intelligent CRM data pipelines, including duplicate resolution and multi-source lead record merging (Mojo, XLeads, Direct Skip), improving overall data accuracy and consistency.
- Built secure backend services using PL/pgSQL RPCs via PostgREST, along with audit logging, monitoring, and optimized bulk import mechanisms to enhance CRM reliability and performance.

**AlertGen — AI-Powered Allergy Management Application**

**Pangasinan State University** · March 2025 – December 2025

- Led a multidisciplinary team using the Scrum methodology throughout the software development lifecycle.
- Developed an AI-powered allergy management application for mobile devices using Flutter, Gemini 2.5 Pro, and OCR to identify food allergens from product labels.
- Implemented emergency hotline, allergy profiles, and Human-in-the-Loop validation.
- Achieved an 80.75 System Usability Scale (SUS) score — rated Excellent — during usability evaluation.
- Coordinated project planning, sprint reviews, documentation, and stakeholder presentations.

**PSU Property Card System — Inventory & Audit Automation**

**Pangasinan State University (Academic/Client-Based)** · June 2025 – August 2025

- Developed a property inventory and acknowledgment receipt management system.
- Automated asset tracking and audit processes for university departments.
- Built administrator dashboards with secure role-based access and reporting features.

**VentaApp — Android-Based Point of Sale (POS) System**

**Pangasinan State University (Academic/Client-Based)** · December 2024 – January 2025

- Built an Android-based point-of-sale application for retail businesses.
- Implemented inventory management, sales processing, and transaction history.
- Optimized the checkout workflow with reliable offline data storage.

**Wanderland — Gamified Mobile Exploration Application**

**Pangasinan State University (Academic/Client-Based)** · May 2025 – June 2026

- Developed a gamified location-based exploration application.
- Integrated Google Maps and weather services for real-time navigation.
- Designed engaging interfaces that encouraged user exploration.

**Preparator — Personalized Educational Review Application**

**Pangasinan State University (Academic/Startup Project)** · October 2024 – May 2025

- Served as the Android UI/UX Designer and Assistant Programmer for an early-stage educational technology startup.
- Created intuitive user interfaces and wireframed logical user flows tailored to deliver a personalized, distraction-free study experience.
- Collaborated closely with the core development team to program, test, and deploy critical Android application features.
- Executed quality assurance testing and UI optimizations to enhance overall application stability and improve user retention metrics.
- Developed and implemented robust local database solutions to ensure reliable system logic and seamless data handling for user progress tracking.

**EDUCATION**

---

**Bachelor of Science in Information Technology, Major in Mobile and Web Development**

**Pangasinan State University – Urdaneta City Campus** · Urdaneta City, Pangasinan, Philippines · 2026 · 1.72 GWA

- Academic Distinction | CHED Tulong Dunong Program (TDP) Scholar

**CERTIFICATIONS**

---

**Meta Android Developer Professional Certificate** — Coursera · 2025

**Test of Practical Competency in ICT (TOPCIT) – Level 3 Passer** — TOPCIT · 2025

**PSU Representative – Android Development Productivity** — IT Skills Olympics · 2025

**Best App Design Idea** — INNO Box Design for Change · 2025

**DICT-GD001 Principles of Design** — Department of Information and Communications Technology (DICT) · 2024

**INVOLVEMENT**

---

**Internal Public Relations Officer**

**INTEL Information Technologists' League** · Pangasinan State University, Urdaneta City Campus · August 2025 – August 2026

- Managed internal communications and promotional campaigns to increase student awareness and participation in departmental activities.
- Collaborated with executive officers to disseminate timely announcements through digital platforms and publication materials.
- Strengthened communication between the organization and IT students by ensuring consistent and accessible information delivery.

## **Creative and Design Committee Head**

**INTEL Information Technologists' League** · Pangasinan State University, Urdaneta City Campus · September 2023 – August 2026

- Led a team of student designers in producing branding, promotional materials, and digital assets for 10+ university events and IT department initiatives.
- Directed the end-to-end creative process, ensuring consistent visual identity across digital and print media.
- Coordinated with organization officers to deliver high-quality designs that enhanced event promotion and student engagement.
